

Breaking For Safety

Did you know...

Minnesota State Statute Section 169.072 provides that all items within two feet of the curb on curbed streets must be traffic safe unless a special license has been granted and included with the homeowner's insurance policy.

What this means for Mankato homeowners...

When planning to install items, such as mailboxes, between the curb and the property line, it is important to make sure they break when hit. This ensures the safest outcome possible should a car, snow plow, or other vehicle happen to hit that item.

Mankato continues to work toward providing the best customer service possible. Part of that is by helping homeowners know of certain legal requirements that will affect them.

For more information contact the City of Mankato's Engineering office at 387-8634.
